

# Merry Christmas

Full tutorial with pictures can be found on [www.graceflorastudio.com](http://www.graceflorastudio.com)

## HOW TO MAKE A CHRISTMAS WREATH

### 01

#### BUNDLE

Make a bundle by grouping 2-4 types of fresh evergreen (trimmed to 3" - 5"). Before you start wiring, place your bundles in the rough location on your wreath to achieve your desired look. For an asymmetrical look, you may want to try a few different spots to see where you want it to curve. *Suggested evergreens: Juniper, Arborvitae, Douglas Fir, White Pine, Eucalyptus.*

### 02

#### WIRE

Place your bundle on the wreath. Using your floral wire, wrap the stems of your bundle onto the wreath several times until it feels secure. **DO NOT CUT THE WIRE.**

### 03

#### LAYER

Make a second bundle and layer it over the first bundle so you cover the wire. Wire the second bundle as above and **do not cut the wire.** Repeat until you achieve your desired look.

### 04

#### ACCESSORIZE

Add pinecones, holly, ribbon, cinnamon sticks, dried oranges or ornaments to spruce it up! Attach using the same wire or glue gun. When you have achieved your final look, wrap your wire around the wreath a few more times and now you can cut it. Hang it on your front door to show off this winter beauty!
